How To Clean A Brush

For Water Based Paints :- First remove excess paint then wash with warm soapy water, when all remaining paint has been removed, rinse thoroughly in running water. shake the brush well and then hang up to dry.

For Oil Based Paints:- First remove excess paint, when all remaining paint has been removed then wash with turpentine oR Kerosene (Not in water) and hang up to dry.

Caution:-
a) Clean the brush and keep in sleeping position 
b) Do no keep the Brush in bucket with water For full night 

How To Clean A Roller

Always clean both rollers tray immediately after use and do not allow the roller to dry out clenaing breaks in use. after use slip off the roller and wash thoughly under running water. allow the roller to dry completely before storing.
